

Critical Information Summary

For your SSBI nbn® Fixed Wireless Service

Plan/Tier	Wireless Plus
Minimum/ Maximum Monthly Charge	\$0.00
Minimum Total Cost (first month)	\$0.00
Early Termination Fees	\$0.00
Contract Term	No lock-in contract Automatic expiration 30 June 2028
Data Allowance	Unlimited
Maximum Theoretical Attainable Speeds*	Down 25-100 Mbps Up 5-20 Mbps

*Speed tiers provided by nbn® are subject to the rollout of network upgrades. Some premises will require nbn® to complete upgrades to the equipment at the premises. Actual achievable speeds can only be confirmed after your service is active. We will be publishing data on actual customers' typical evening speeds as soon as accurate data can be obtained.

Service Overview

The Plan delivers a residential internet service through the nbn® Fixed Wireless network to eligible School Student Broadband Initiative (SSBI) customers for \$0 per month (Nil Monthly Charge) until the 30th of June 2028 (Discount Period), subject to [Skymesh's terms and conditions for SSBI customers](#). Please note that this service is not suitable for business applications and requires a clear line-of-sight to an nbn® tower for optimal performance.

Service availability depends on confirmed coverage at your location. We will check your address during the application to confirm if Fixed Wireless is suitable for your premises. Fast and Superfast plans are subject to nbn's network upgrade rollout and are not available everywhere. Some premises may require nbn® to upgrade connecting equipment before achieving faster speeds.

Plan Essentials

You will receive an invoice each month; however, it will show \$0 payable per month for the Plan you are on until the 30th of June 2028.

If you change your Skymesh plan or this service during the Discount Period, or once the Discount Period ends, you will be charged the applicable fees and charges as per the CIS of your new plan. This amount is set out in our CIS and Pricing Schedule available at: <https://www.skymesh.net.au/school-student-broadband-initiative>.

There is no setup fee or lock-in contract applied to this Offer.

All other charges, such as upgrades, additional data packs, other internet services, installation and other charges for non-standard installation will continue to apply.

If the SSBI program is not extended beyond 30 June 2028, you will have the option of taking up either the equivalent or any other Skymesh plan or cancelling your service. Prior to reaching the end of the program, Skymesh will be in contact to discuss your options.

Service Performance and Limitations

Actual speeds for nbn® Fixed Wireless services can be confirmed once your service is activated, and we can measure the performance at your location. These speeds will vary due to factors such as nbn® cell congestion, weather,

geography, line of sight to the tower, local conditions, vegetation, building obstructions, and signal interference. We will provide you with information about the speeds you can typically achieve once your service is active. If you experience speed issues, we provide troubleshooting support and will work with you to improve performance. If speeds cannot be improved to a satisfactory level, you can cancel your service without penalty.

Equipment and Installation

To use this service, you'll need an nbn®-compatible router. You will be provided with one as part of this program. If you choose to bring your own device and not use the one that has been provided, please note that we can only provide limited technical support.

Standard installation is included at no additional cost and will be performed by an nbn®

technician. This includes mounting an antenna on your roof and installing an internal connection box. You will need to ensure a 240-volt power supply is available at the installation point. Additional charges may apply for non-standard installations. Please note that any equipment installed by nbn® remains their property.

Monitoring Your Service

While your plan includes unlimited data, you can monitor your usage and service performance through our My Skymesh portal at <https://my.skymesh.net.au/usage>. Here you can access real-time usage statistics, set up email alerts, view connection status, and download detailed historical reports.

You can also set up email notifications for any service issues or maintenance updates through the My Skymesh portal. Monthly usage summaries are also available.

Fair Use and Important Policies

The Wireless Plus Plan is subject to the nbn® co's [Fair Use Policy](#).
